## ABSTRACT

There have been obtained, by cultivation of <a href="Streptomyces">Streptomyces</a> sp. MK730-62F2 (deposit number of FERM BP-7218), antibiotic caprazamycins A to F having by the following general formula (I)

10 
$$H_3CO \rightarrow OCH_3 O CH_3 O CH$$

wherein R is tridecyl group, 11-methyl-dodecyl group, and others. These caprazamycins have excellent antibacterial activities against various acid-fast bacteria and various bacteria as well as their drug-resistant strains.
